💡 PROFESSIONAL SUMMARY

DevOps & Infrastructure Engineer with 6+ years of experience designing, automating, and managing enterprise infrastructure. Strong background in Linux, virtualization, Kubernetes, +containers, Infrastructure as Code, CI/CD, and GitOps. Experienced in building and automating infrastructure and application delivery workflows using Terraform, Ansible, Docker, Kubernetes, Helm, GitHub Actions, GitLab CI/CD, and ArgoCD. Background in enterprise infrastructure including VMware, NSX, vCloud Director, high-availability environments, and disaster recovery. Focused on automation, reliable infrastructure, Kubernetes platforms, continuous delivery, and cloud-native technologies. Also experienced in backend development, providing a strong understanding of application and infrastructure integration.

👛 PROFESSIONAL EXPERIENCE

Freelance DevOps & Backend Developer | Remote

July 2023 – Present

- Designed and implemented CI/CD pipelines using GitHub Actions and GitLab CI/CD, reducing deployment time by approximately 70% while improving deployment reliability through automated testing.
- Designed and managed Kubernetes application deployments using Helm and Kustomize for multiple environments.
- Implemented GitOps workflows with ArgoCD, enabling automated and version-controlled application delivery.
- Provisioned and managed infrastructure using Terraform and Ansible, following Infrastructure as Code (IaC) principles.
- Containerized applications using Docker and Podman and integrated containerized workloads into automated deployment workflows.
- Implemented Kubernetes observability using Prometheus, Grafana, Loki, and AlertManager, providing centralized metrics, logging, alerting, and application health monitoring.
- Designed and developed RESTful APIs using Node.js, NestJS, Prisma ORM, and PostgreSQL, providing application-level development experience complementary to infrastructure responsibilities.

Senior Infrastructure Engineer | Havana (Remote)

August 2019- July 2023

- Led the deployment of enterprise infrastructure projects across 5+ sites, supporting business-critical applications and services using Huawei and Fujitsu blade server infrastructure.
- Managed VMware vCenter, NSX, and vCloud Director environments supporting 100+ virtual machines and production workloads requiring high availability.

- Designed and implemented Disaster Recovery solutions using Veeam Backup & Replication, improving business continuity, and reducing recovery time objectives (RTO).
- Automated infrastructure deployment, configuration, and operational workflows, reducing infrastructure provisioning time by approximately 60%.
- Managed enterprise virtualization and infrastructure environments with a focus on availability, reliability, automation, and operational efficiency.

TECHNICAL SKILLS

Infrastructure & Virtualization	VMware vCenter, VMware NSX, vCloud Director, Proxmox, Private Cloud Infrastructure
Cloud / Platform	Kubernetes, k3s, Docker, Podman, Helm, Kustomize
GitOps	ArgoCD
Infrastructure as Code & Automation	Terraform, Ansible
CI/CD & Automation	GitHub Actions, GitLab CI/CD, Deployment Automation
Observability	Prometheus, Grafana, Loki, AlertManager
Container Registry & Security	Harbor, Docker Hub, Trivy
Operating Systems	Linux, Windows Server

KEY PROJECTS

TaskApp - GitOps Kubernetes Platform

This project demonstrates a production-oriented GitOps workflow for deploying a full-stack application on Kubernetes. The primary goal is not the Todo application itself, but showcasing modern DevOps practices including GitOps, Helm packaging, private container registries, automated deployments with ArgoCD, and Kubernetes-based application lifecycle management.
